

Sebastian O Rodriguez

sebastian@guavatt.com · github.com/Sebastian-O-Rodriguez · linkedin.com/in/sebastianorodriguez

Summary

Full-stack engineer shipping production AI systems end-to-end — LLM integration, golden-set evals, RAG, observability, and bounded agentic loops — with strict security (RLS) and testing discipline (80%+ coverage). Founder of Guava AI; previously Scale AI and Salesforce.

Technical Skills

Languages: TypeScript, Python, SQL, JavaScript

Frontend: React, Next.js, Expo / React Native, Tailwind, shadcn/ui, Astro, Svelte

AI / LLM: OpenRouter, LLM evals, RAG, agentic loops, observability, Supabase RLS

Backend / Infra: Node, NestJS, FastAPI, PostgreSQL, Prisma, Azure, GitHub Actions

Experience

Guava AI — Founder & Full-Stack Engineer

2025–Present · Remote

- Ship the full Guava AI product stack: agent orchestration (guava-os) with governed execution via dependency graphs, worktree isolation, and review gates (258 tests); client BI analytics (guavabi) with a deterministic engine behind an LLM trust boundary (514 tests).
- Build client-facing dashboards and automations; scope requirements, run diagnostics, and deliver reports directly with clients. TypeScript, Python, FastAPI, Next.js, PostgreSQL.

Scale AI — Strategic Projects

2022–2024 · Remote

- Led text/multimodal data-labeling operations: took queue quality 25% → 75% in 4 days, scaled daily production 250 → 25,000+, and built an onboarding funnel producing 250+ qualified hires; managed 50+ operators.

Salesforce — Technical Writer

2020–2022 · Remote

- Launched an elastic services product with a 3-person team; owned product + API reference documentation and internal knowledge base.

Projects

RoutineMe — AI health tracker

2025

- AI health tracker: LLM classifier → RAG-grounded nutrition estimator → typed action executor. Golden-set evals hit 100% on a live OpenRouter run; per-call AI observability; bounded 3-step agentic loop; RLS. Expo, Supabase, OpenRouter.

PMLaD — Multi-tenant property SaaS

2024–2025

- Multi-tenant property platform with 4-layer RLS tenant isolation (FORCE RLS, boot-time verification) and staged Azure CD gated on 80%+ coverage and Playwright E2E. Next.js, NestJS, Prisma, PG16, Azure.

Education

Carnegie Mellon University — BS Technology & Sonic Product Innovation, Minor Business Administration
