

Sebastian O Rodriguez — Full-Stack AI Engineer

Delaware, US · sebastian@guavatt.com · github.com/Sebastian-O-Rodriguez · [linkedin.com/in/sebastianorodriguez](https://www.linkedin.com/in/sebastianorodriguez) · guavaai.ai

Summary

Full-stack engineer shipping production AI systems end-to-end — LLM integration, evals, RAG, observability, bounded agentic loops — with strict security and testing discipline. Founder of Guava AI; previously data operations at Scale AI and technical writing at Salesforce.

Experience

Guava AI — Founder & Full-Stack Engineer (2025–Present, Remote)

Built the full product stack: agent orchestration (guava-os), client BI analytics (guavabi), company site (guava-site). Governed agent execution with dependency graphs, worktree isolation, and review gates; deterministic analytics behind an LLM trust boundary — AI parses intent, metrics stay deterministic. Direct client scoping, diagnostics, and reporting. *TypeScript, Python, FastAPI, Next.js, React, PostgreSQL, Polars, OpenRouter*

Scale AI — Strategic Projects (2022–2024, Remote)

Led text/multimodal data-labeling operations. Took queue quality 25% → 75% in 4 days; scaled daily production 250 → 25,000+; built an onboarding funnel producing 250+ qualified hires; managed 50+ operators. *Python, Data Operations, Process Design, Documentation*

Salesforce — Technical Writer (2020–2022, Remote)

Launched an elastic services product with a 3-person team: product + API reference + internal knowledge base. *Technical Writing, API Docs, Product Launch*

Education

Carnegie Mellon University — BS Technology & Sonic Product Innovation, Minor Business Administration (2020)

Selected Projects

- **RoutineMe** — AI health tracker: LLM classifier → RAG-grounded estimator → typed actions; golden-set evals, AI observability, RLS, 3-step agentic loop. Expo, Supabase, OpenRouter.
- **PMLaD** — Multi-tenant property SaaS: 4-layer RLS tenant isolation, staged Azure CD (80%+ coverage, Playwright E2E). Next.js, NestJS, Prisma, PG16, Azure.

Technical Skills

Area	Skills
Languages	TypeScript, Python, SQL
Frontend	React, Next.js, Expo / React Native, Tailwind, shadcn/ui, Astro, Svelte
Backend/LLM	Node, NestJS, FastAPI, OpenRouter, LLM evals, RAG, agentic loops, AI observability
Data/Security	PostgreSQL, Supabase (RLS, auth), Prisma, Polars; RLS, Clerk, JWT, fail-closed, RBAC
Testing/DevOps	Vitest, Jest, Playwright, coverage gates, GitHub Actions, Azure, Docker, Cloudflare
